PROFESSIONAL SUMMARY

Information Security / Cybersecurity Analyst with hands-on Security Operations Center (SOC) experience in Security Information and Event Management (SIEM) monitoring, alert triage, vulnerability assessment, policy compliance, and Identity & Access Management (IAM). Proven ability to support operations in fast-paced environments while protecting public and private sector data.

EDUCATION & CERTIFICATIONS

B.S. Cybersecurity – University of Mary Washington (August 2021 – May 2025)

CompTIA Security+ – Network Security, Threat/Risk Analysis, Risk Management Framework (RMF), Identity & Access Management (IAM), Incident Response

CompTIA Network+ – Network Engineering/Administration, Switching/Routing, TCP/IP, DNS, DHCP, LAN/WAN/VLAN

CompTIA CySA+ – Incident Response, Threat Detection, Vulnerability Management, Security Monitoring, Log Analysis

PROJECTS

Enterprise Network Design — Cisco Packet Tracer

- Designed a segmented, redundant enterprise network topology featuring dual edge routers, dual ASA firewalls, and redundant Layer 3 switches with a dedicated failover link.
- Implemented department-level VLAN segmentation and centralized infrastructure services including RADIUS (AAA), Syslog, NTP, and DHCP.
- Validated connectivity and segmentation policy through ping/traceroute testing and simulated failover scenarios.

Home Lab

- Built and maintained a self-hosted lab environment for hands-on network engineering, system administration, and application analysis.

TECHNICAL SKILLS

- **Security Operations:** Security Information and Event Management (SIEM) Monitoring, Identity & Access Management (IAM), SOC Operations, Alert Triage, Data Loss Prevention (DLP), Endpoint Detection & Response (EDR), Vulnerability Management
- **Tools & Platforms:** Splunk Enterprise Security (ES), Tenable, ForeScout, SailPoint, Symantec, Nmap, Wireshark, Microsoft Office Suite
- **Operating Systems:** Linux, Windows
- **Additional Tools & Platforms:** Active Directory, Microsoft Azure, Jira, ServiceNow

EMPLOYMENT EXPERIENCE

SOC Analyst Contractor | Virginia Department of Transportation *January 2026 – Present*

- Perform continuous security monitoring and alert triage using Splunk Enterprise Security (SIEM), reviewing an average of 15 alerts per shift.
- Validate, classify, and escalate security alerts based on risk and impact, maintaining a 100% on-time escalation rate against SLA targets.
- Leverage Tenable for vulnerability context, ForeScout for device visibility, SailPoint for Identity & Access Management (IAM) insights, and Symantec for endpoint activity review across 15,000 monitored endpoints.
- Document findings clearly and follow SOC playbooks for consistent response and handoff, contributing to monthly incident reports.
- Create and maintain Standard Operating Procedures (SOPs) for alert handling and recurring SOC processes.

Information Security Intern | Virginia DBHDS *May 2025 – August 2025*

- Collaborated on vulnerability assessment and formatted data in Excel for ticketing across assets statewide.
- Assisted in the formulation and maintenance of security policies, procedures, and documentation to ensure compliance with SEC and NIST standards.
- Created, deleted, and managed user accounts and groups using KnowBe4, supporting end users statewide.
