Professional Summary

Information Security / Cybersecurity Analyst with hands-on experience in SIEM monitoring, alert triage, vulnerability assessment, policy compliance, and identity & access management. Proven ability to support operations in fast-paced environments while protecting public and private sector data.

Education & Certifications

B.S. Cybersecurity – University of Mary Washington (August 2021 – May 2025)

CompTIA Security+ (Network Security, Threat/Risk Analysis, RMF, IAM, Incident Response)

CompTIA Network+ (Network Engineering/Administration, Switching/Routing, TCP/IP, DNS, DHCP, LAN/WAN/VLAN)

Projects – Home Lab creation (Hands-on network engineering, system administration, application analysis)

Technical Skills

- Security Operations: SIEM Monitoring, IAM, SOC Operations, Alert Triage, DLP, EDR, Vulnerability Management
- Tools & Platforms: Splunk ES, Tenable, ForeScout, SailPoint, Symantec, Nmap, Wireshark, Microsoft Office Suite
- Operating Systems: Linux, Windows
- Academic Experience: Active Directory, Software Security, Jira, ServiceNow

Employment Experience

SOC Analyst Contractor | Virginia Department of Transportation | January 2026 – Present

- Perform continuous security monitoring and alert triage using Splunk Enterprise Security.
- Validate, classify, and escalate security alerts based on risk and impact.
- Use Tenable for vulnerability context, ForeScout for device visibility, SailPoint for IAM insights, and Symantec for endpoint activity review.
- Document findings clearly and follow SOC playbooks for consistent response and handoff.
- Create and follow SOPs for alerts and processes

Information Security Intern | Virginia DBHDS | May 2025 - August 2025

- Collaborated on vulnerability assessment and formatting data in Excel for ticketing.
- Assisted in the formulation and sustenance of security policies, procedures, and documentation pertaining to compliance with SEC and NIST standards.
- Created, deleted, and managed user accounts and groups using KnowBe4.
